Safety Emergency Notice: SEN-15-01		Email	Subscribe	Unsubscribe
		Effective Date: 06/23/2015		
		Resolution Date: 06/23/2017		
Title: Cargo Securement				
Facility: ALL				
District: All Districts				
Status: Active/Issued				
Summary:	UPDATE: Resolution date extended to June 23, 2017. This SEN is being published to provide notification that unsecured materials in the cargo area of on-road vehicles have the potential to shift or move forward suddenly during transport, leading to injuries to the driver and passengers.			
Background:	FAA employees have experienced and reported injuries as a result of operating on-road vehicles without the use of necessary cargo securement equipment and devices (netting, ropes/cords, tie downs, straps, etc.).			
Action:	Local management must ensure employees properly secure and restrain cargo and equipment in all on-road vehicles used for official FAA business, using necessary equipment/devices (netting, ropes/cords, tie downs, straps) to secure loads during transport. If cargo securement equipment is not available for use in the vehicle, employees should contact their SECM for assistance in obtaining or procuring necessary devices.			
	While the presence of the above mentioned equipment is not required in privately owned vehicles and rental cars, the use of cargo securement equipment is highly recommended during vehicle operation by FAA employees.			
Resolution:	This SEN will expire one year from the above effective date.
